

# ShrinkFlex™

INDUSTRIAL PACKAGING

THE **FLEXIBLE PACKAGING SOLUTION** FOR **BEVERAGE CONTAINERS**

# ShrinkFlex™

## **ShrinkFlex™ – COLLATION SHRINK FILM FOR THE MOST DEMANDING REQUIREMENTS**

We are familiar with your requirements – and have developed a flexible packaging solution, which meets the highest standards, for beverage containers: ShrinkFlex™ collation shrink film.

For many years, Bischof + Klein has been producing collation shrink films to manufacture protective packaging for the beverage and food industry.

With ShrinkFlex™, B+K is once again staking its claim as a strong, high-quality partner to this industrial sector. Together with SmartFlex® and SmartFlex® SE stretch hood films, our innovative collation shrink film, ShrinkFlex™, forms a packaging solution chain which meets the diverse requirements of containers and goods on pallets.

## **OPTIMAL SECURITY – BEST POSSIBLE PROTECTION**

What SmartFlex® and SmartFlex® SE accomplish as protective packaging for pallets and unwieldy, packaged products, ShrinkFlex™ achieves for various sizes of beverage container: optimal security and best possible protection during transportation and storage.

ShrinkFlex™ – the basic element of an all-round solution in terms of flexible packaging.

Quality is the basic condition of all success.

As a successful company within the beverage industry, you therefore make the very highest demands on

- the durability of flexible packaging
- the stability of the packaged goods during transportation and storage
- optical appearance and display effect
- the cost efficiency of a packaging solution
- correspondence between brand requirement and packaging solution
- the applicability of a packaging solution for diverse container formats
- processing methods which make sparing use of resources.

## CHARACTERISTICS WHICH SPEAK FOR **THEMSELVES**

### ShrinkFlex™

- Makes an effective contribution towards protecting product containers and the high stability of packaged goods
- Can be used as a basic solution and can also be equipped with many extras
- Covers diverse container formats
- Is both an inexpensive and environmentally-friendly packaging solution thanks to its economical use of resources
- Reveals very good machine runability
- Runs on all conventional conversion lines
- Is a genuine innovation in the field of flexible protective packaging

### ShrinkFlex™

TRANSFORMS YOUR **PRODUCT CONTAINERS**  
INTO REAL **EYE-CATCHERS**

ShrinkFlex™ can be printed with up to ten colours. This collation shrink film also reveals extremely high transparency and impresses with the fine gloss of its material. In this way, ShrinkFlex™ contributes towards an optimal optical appearance and extremely prominent display effect.

As a result, your product containers are not only protected and secured during storage, but also prove to be genuine attractions at the point of sale. ShrinkFlex™ – quality which impresses. And catches the eye.

## WE **THINK** IN **INNOVATIONS**

To us, thinking innovatively not only means achieving the best possible technical level of a packaging solution. To us, quality is the aspect of prime importance.

ShrinkFlex™ is innovation par excellence:

This collation shrink film format is characterised by the requirement for less material per container than comparable films – whilst simultaneously offering extraordinarily high tensile strength and extreme durability.

## **CONVINCING PERFORMANCE:**

### **ShrinkFlex™ extrusion**

- Film thicknesses from 20 my to 80 my
- Mono or coex versions
- With mono or bi-axial shrink values
- With or without needling
- Transparent and coloured versions
- UV stabilisers and anti-static agents
- Inline printing of up to three colours

### **ShrinkFlex™ printing**

- Printing width of up to 1900 mm
- Flexographic printing of up to ten colours
- Gravure printing of up to eight colours

### **ShrinkFlex™ conversion**

- Material on reels as required

## SERVICE IS OUR PRINCIPLE

Our production and sales network encompasses various plants and stretches from western and central Europe to overseas locations. As a result of this, we are able to guarantee our customers logistically flexible delivery and optimal technical support by local employees. Our headquarters in Lengerich is responsible for ensuring the quality and high-tech standard of our products, in addition to co-ordinating all development processes centrally.

If you have any questions, please contact your usual B+K sales agent. For initial contact to obtain extensive information on ShrinkFlex™, simply send an e-mail to [shrinkflex@bk-packaging.de](mailto:shrinkflex@bk-packaging.de). One of our employees will contact you as soon as possible.

## EXAMPLES OF B+K PRODUCTS FOR THE BEVERAGE INDUSTRY:

**FlexAround™ stretch** –  
PE film for manufacturing expansion sleeves

**FlexAround™ wrap** –  
PE film for manufacturing wrap-around labels

**SmartFlex®**, **SmartFlex® SE (super elastic)**,  
**SmartFlex® HT (highly-transparent)** and  
**SmartFlex® MP (macro-perforated)** –  
the stretch hood film family for securing loads on pallets to the highest standards
