

SmartFlex® SE

INDUSTRIAL PACKAGING

THE **FLEXIBLE PACKAGING SOLUTION** FOR THE MOST DEMANDING **REQUIREMENTS**

SmartFlex® SE

- The requirements you make on protecting your palletised goods are extremely high.
- Over and above standard methods, you are also reliant on optimal packaging solutions for diverse pallet formats and unwieldy, packaged products.
- You are looking for a flexible packaging solution which eradicates the disadvantages of the wind-stretch process.
- It is important to you that your palletised goods are protected against theft during transportation and storage.
- You think and act in a cost-conscious manner – and implement effective packaging solutions which meet these requirements.
- You are interested in packaging solutions which are environmentally-friendly due to their sparing use of resources.

We are familiar with your requirements – and have developed a flexible packaging solution which meets the highest standards: SmartFlex® SE.

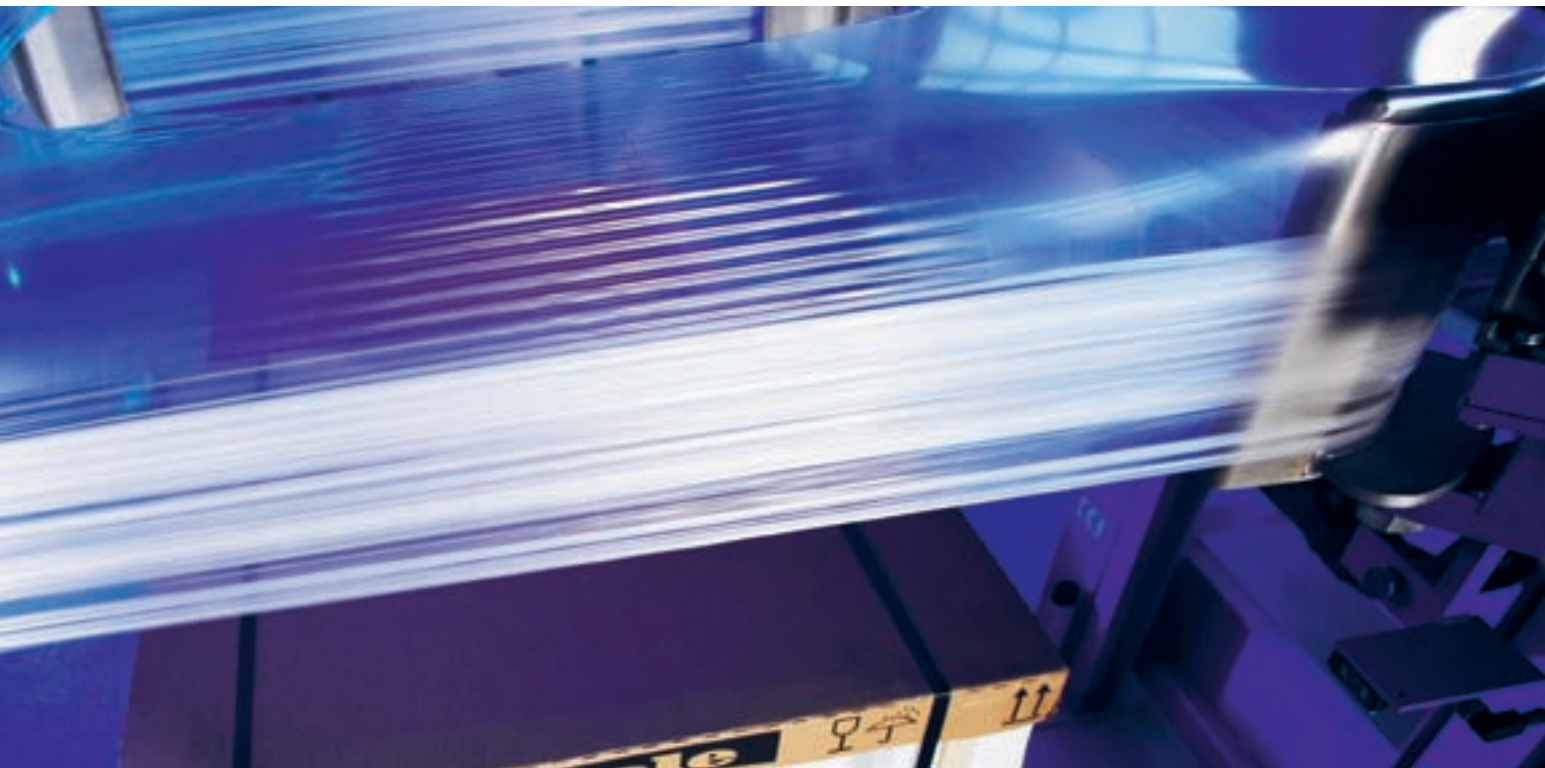

Tailor-made flexibility: SmartFlex® SE allows two pallets to be stretch-wrapped as easily as an individual pallet – using the same film format. A solution as simple as it is effective.

CHARACTERISTICS WHICH SPEAK FOR THEMSELVES – SmartFlex® SE

- Is super elastic and absolutely impermeable – and protects packaged goods both effectively and individually
- Reveals high dart impact – and optimally protects packaged goods against theft
- Enables both large pallets and pallet combinations to be stretch-wrapped – and is a universal stretch hood solution for diverse market segments
- Eradicates the disadvantages of the wind-stretch process – and is a genuine alternative in terms of flexible packaging
- Is machine runnable on all conventional stretch hood lines – and is a simple, fast and cost-effective packaging solution
- Enables material to be saved – and is therefore both economical and environmentally-friendly

INNOVATIVE, ECONOMICAL, CONVINCING:

SmartFlex® SE IS THE **FLEXIBLE** PACKAGING SOLUTION FOR **THE MOST DEMANDING** REQUIREMENTS.

SmartFlex® SE - A GENUINE ALTERNATIVE

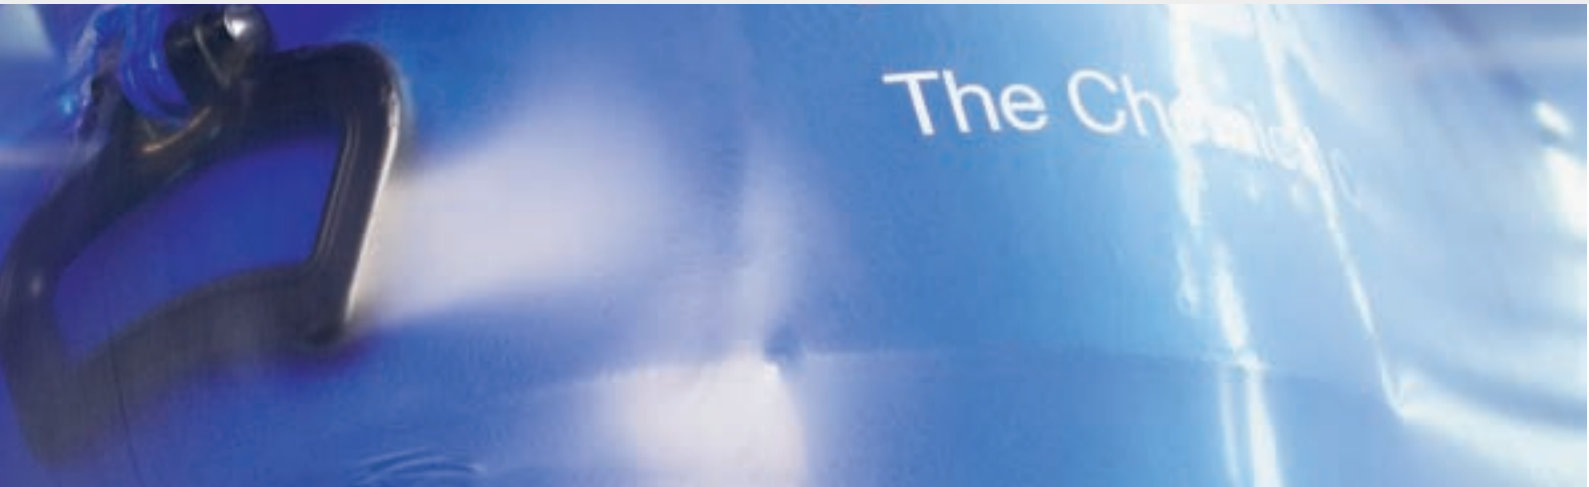

We have developed SmartFlex® SE on the basis of our innovative SmartFlex® stretch hood film. SmartFlex® SE combines the former's familiar characteristics whilst acting as an optimal, flexible packaging solution for diverse pallet formats. As a stretch hood film, SmartFlex® SE allows both pallets of diverse sizes and unwieldy, packaged products to be stretch-wrapped and also enables pallets to be bundled – with constant, optimal protection of the packaged goods. This makes SmartFlex® SE a genuine alternative to wind-stretch films.

SmartFlex® SE impresses thanks to its super elasticity and extremely high dart impact.

In contrast to conventional wind-stretch methods, this enables packaged goods to be optimally protected against theft. The film hugs the products which it protects like a second skin; amongst other advantages, this allows barcodes to be read without problem. SmartFlex® SE encases the packaged goods in the same way as a cocoon – and, similarly, is a one-piece packaging solution.

Thanks to its enormous elasticity and outstanding mechanical properties, SmartFlex® SE enables sparing use of material and resources, and can be processed on all conventional stretch hood lines.

SERVICE IS OUR PRINCIPLE

Our production and sales network encompasses various plants and stretches from western and central Europe to overseas locations. As a result of this, we are able to guarantee our customers logistically flexible delivery and optimal technical support by local employees. Our headquarters in Lengerich is responsible for ensuring the quality and high-tech standard of our products, in addition to co-ordinating all development processes centrally.

If you have any questions, please contact your usual B+K sales agent. For initial contact to obtain extensive information on SmartFlex® SE, simply send an e-mail to smartflex@bk-packaging.de. One of our employees will contact you as soon as possible.
